### Explications des tableaux "pointage des balises" :

Pour des raisons purement techniques, les postes sont numérotés X+100. Par exemple, PP001 = 101, PP098 = 198, PP100 = 200

Les PC sont numérotés de 31 à 35

### Codes couleur :

Vert = balise verte pointée

Bleu = balise bleue pointée

Rouge = balise non pointée

Vert clair = leurre du "Bal des bosquets" non pointé

Rose = leurre du "Bal des bosquets" pointé

Les postes 54 et 60 ont malheureusement dû être neutralisés (vandalisme)

### Comptage temps

Le temps de la colonne "Arrivée" est en jour:heure:minute:seconde, le départ ayant lieu la veille

Chaque minute à partir de 15h00 compte triple ... et chaque seconde compte
